Air Flow Control

Rack Replacement Panels for Data Centres

EZIwall
Temporary wall panels for air flow containment

Replacement Racks for Containment Installations.

Prevent hot air recirculation in an existing hot or cold containment aisle, or just block an open rack space...

EZI—Replacement Racks!

A cost effective way to maintain important air flow dynamics within a Data Centre.

These EZIBLANK®WALL replacement racks are assembled in minutes, creating a stable rack sized

air flow barrier, that can be positioned anywhere and re-used again and again.

Assembled from flat sheet, EZIBLANK®WALL panels build quickly into a strong, stable triangular structure. Each individual rack consists of 1 sheet of 2290mm x 2260mm.

Easily construct a full height rack in seconds.

..just rotate to suit desired rack width...

600mm   **750mm**   **800mm**
